

## The Geysers by the Numbers

### The Geysers Geothermal Field 2017 Statistics

#### The Geysers – 15 Power Plants (Calpine & NCPA)

- 75 miles north of San Francisco, California
- 12 power plants in Sonoma County (10 Calpine, 2 Northern California Power Agency)
- 3 Calpine power plants in Lake County

#### Calpine Geothermal Operations

- 29,000 acres (45 square miles)

#### Geothermal Wells

- 322 steam wells
- 54 injection wells
- Deepest well: 12,900 feet, or over two miles
- Average well depth: 8,500 feet
- Total Calpine Geysers wells drilled to date: 591
- Today's average grass-roots drilling time: 85 days (75 days drilling + 10 rig up/down)
- First exploratory well: 1920
- First modern well: 1955
- 2017 average steam production per well: 36,036 pounds per hour
- Average reservoir steam temperature: 374 degrees Fahrenheit
- Average flowing steam pressure: 82 PSIG
- Most recent steam well drilled: Prati 31, January 2017
- Most recent injection well drilled: CMH8, May 11, 2017

#### Facilities

- 13 geothermal plants
- Steam pipelines: 80 miles
- Injection water lines: 69 miles
- 21kV power lines: 70 miles
- Project roads: over 167 miles

#### Water Injection

- Two large-scale wastewater injection projects provide an average 15.09 million gallons daily (MGD)
  - Santa Rosa Geysers Recharge Project average: 11.69 MGD
  - Calpine Southeast Geysers Effluent Pipeline average: 3.4 MGD
  - Calpine + Northern California Power Agency: 7 MGD

#### Power Generation

- First commercial power plant: Unit 1, Startup - September 1960
- Most recent plant built: Aidlin, 1989
- 2017 average output: 647.7 net megawatts
- 2017 generation: 5,673,647 net megawatt hours
- 2017 average unit availability: 94%

#### Visit The Geysers

- **Visit:** The Calpine Geothermal Visitors Center in Middletown, California, Wednesdays through Saturdays from 11:30 a.m. to 5 p.m. (admission is free)
- **Tour:** Sign up for a free geothermal power plant tour led by an experienced Calpine team member by visiting [www.geysers.com](http://www.geysers.com) or calling 1-866-GEYSERS or 707-987-4270.

### Calpine at The Geysers

Calpine Corporation is America's largest generator of electricity from natural gas and geothermal resources with operations in competitive power markets. Our fleet of 79 power plants in operation represents more than 26,000 megawatts of generation capacity. Through wholesale power operations and our retail businesses Calpine Energy Solutions and Champion Energy, we serve customers in 24 states, Canada and Mexico. Our clean, efficient, modern and flexible fleet uses advanced technologies to generate power in a low-carbon and environmentally responsible manner. We are uniquely positioned to benefit from the secular trends affecting our industry, including the abundant and affordable supply of clean natural gas, environmental regulation, aging power generation infrastructure and the increasing need for dispatchable power plants to successfully integrate intermittent renewables into the grid. Please visit [www.calpine.com](http://www.calpine.com) to learn more about how Calpine is creating power for a sustainable future.
